

Just a friendly "Fribbit®" Reminder

Just a friendly reminder...

If you have not made an appointment for an eye examination with your child's optometrist, we encourage you to do so. If arranging the eye examination is a problem, or if you have any questions about the *Eye See...Eye Learn®* program, please call the *Eye See...Eye Learn®* Coordinator at the Alberta Association of Optometrists at 780-451-6824 ext 232 or toll-free at 1-800-272-8843.

Up to 80% of what children learn is acquired through their vision. Your child may not know if they are seeing properly but an optometrist will.

Taking the time to assure that your child has the best visual health possible is a small investment with a big payback. Every child deserves a "healthy start" and a comprehensive eye examination is an important part of your annual health checklist!
